LLOYD'S REGISTER BOOK (The Register of Ships and List of Shipowners are issued annually in July and August respectively; the Appendix in January).

The Register of Ships (in two volumes A–L and M–Z) contains the names, classes and general information concerning the ships classed by Lloyd's Register of Shipping (including the British Corporation Register); also particulars of all known ocean-going merchant ships in the world, of 100 tons gross and upwards.

The second volume (M–Z) also contains floating docks, liquefied gas carriers, ships carrying refrigerated cargo, refrigerated cargo containers, refrigerated stores and container terminals classed with Lloyd's Register and off-shore drilling rigs, as well as lists of changes of ships' names and compound names.

The Register is kept up to date by means of cumulative monthly Supplements containing the latest survey records for all classed ships, and changes of name, ownership, flag, tonnage, &c., for all ships, whether classed or not. Each Supplement is accompanied by particulars of new entries to the Register—that is, new ships and ships of which the names have been changed.

List of Shipowners contains a list of owners and managers of the ships recorded in the Register with their fleets.

The Appendix contains lists of shipbuilders with existing ships they have built; marine enginebuilders and boilermakers; dry and wet docks; telegraphic addresses and codes used by shipping firms; marine insurance companies.

Statistical Tables are issued gratis to Subscribers to the Register Book.

FOREWORD

SPECIAL attention is directed to the necessity of consulting the latest issue of the monthly Supplement for up-to-date records of surveys held on ships classed with the Society.

The information published in this Register of Ships has been obtained from sources which are believed to be reliable, but the Society is unable to guarantee the accuracy of all the details included. In particular, it will be appreciated that, owing to lack of official information from the People's Republic of China, records of merchant ships registered in this country are not complete.

All ships at present classed by Lloyd's Register of Shipping are included in this book. Every effort is made to obtain and publish accurate details of all other merchant ships of 100 gross tons and above which are sea-going.

J. HUXSTER,

July, 1970 *Secretary*

Extract from the Society's Regulations:—

"The Committees of the Society use their best endeavours to ensure that the functions of the Society are properly executed, but it is to be understood that neither the Society nor any Member of any of its Committees nor any of its Officers, Servants or Surveyors is under any circumstances whatever to be held responsible or liable for any inaccuracy in any report or certificate issued by the Society or its Surveyors, or in any entry in the Register Book or other publication of the Society, or for any act or omission, default or negligence of any of its Committees or any Member thereof, or of the Surveyors, or other Officers, Servants or Agents of the Society."

KEY TO THE REGISTER OF SHIPS

Column 1

LR Identity No.

The seven-figured number printed in bold type is used for automatic data processing, and will remain unchanged during the life of the ship.

Call Sign

Assigned by the national authority with which the ship is registered.

Official No.

The number on the register of the national authority.

Navigational aids and other equipment

Df	Direction finder
Esd	Echo sounding device
Gc	Gyro-compass
Pfd	Position fixing device
Rdr	Radar
RT	Radio-telephone
RTm	Radio-telephone (medium frequency)
RTh	Radio-telephone (high frequency)
RTv	Radio-telephone (very high frequency)

Column 2

Former Names

The figures following the former name of a ship indicate the year in which the change of name occurred.

Former names are retained in the Register throughout the life of the ship, and an index to these names is given at the end of the second volume of the Register of Ships.

Owners

The name recorded in **bold type** is that of the registered owner.

Managers

The managers of the ship are recorded if desired.

Port of Registry

A port printed in *italic type* is the home port of a ship and is shown where there is no known port of registry.

Flag

Indicates the national authority with which the ship is officially registered.

Column 3

TONS

Gross tonnage

The gross tonnage printed in **bold type** is measured according to the law of the national authority with which the ship is registered.

This measurement is, broadly, the capacity in cubic feet of the spaces within the hull, and of the enclosed spaces above the deck available for cargo, stores, passengers and crew, with certain exceptions, divided by 100.

Thus 100 cubic feet of capacity is equivalent to 1 gross ton.

Net tonnage

Derived from the gross tonnage by deducting spaces used for the accommodation of the master, officers, crew, navigation, propelling machinery and fuel.

For some ships not sailing under the British flag, the gross and net tonnages have been measured in accordance with British rules and are accepted under British law. In such cases the gross and net tonnages are printed in *italic type*.

Deadweight

The weight in tons of 2240lb of cargo, stores, fuel, passengers and crew carried by the ship when loaded to her maximum summer loadline.

Shelter deck ships

OSD/CSD in column 6 indicates that the ship is a shelter-decker having arrangements for facilitating ready conversion from the open to the closed shelter deck condition or vice-versa. In the open condition the greater part of the upper 'tween-decks space is exempt and not included in the tonnage; in the closed condition the upper 'tween-decks space is included and consequently the tonnages in the CSD condition are greater than in the OSD. When available, tonnages for both conditions are recorded in the Register, the smaller (OSD) tonnages printed above the larger (CSD) tonnages.

T.Mk (Tonnage Mark)

T.Mk in column 3 indicates that the ship has a Tonnage Mark painted, in addition to the Load Line marks, on each side of the ship aft of the Load Line Disc. In its simplest form the Tonnage Mark is a horizontal line with an equilateral triangle standing vertex down on it.

In cases of this kind when two sets of tonnages are recorded the set of smaller tonnages applies when the ship is not loaded beyond the draught indicated by the horizontal line of the Tonnage Mark, and the set of greater tonnages applies when the ship is loaded deeper

T.Mk (Tonnage Mark)—*Continued.*

than that draught; the Load Line Disc is positioned higher on the ship's sides than the Tonnage Mark. The difference between the two sets of tonnages is in accordance with amended Tonnage Regulations now in force for some countries under which tonnages may be measured either excluding the greater part of the upper 'tween-decks space even without a tonnage hatch in the upper deck, or including the upper 'tween-decks space.

In other cases only one set of tonnages is recorded. In these the horizontal line of the Tonnage Mark on the ship's sides is level with the deepest load line; the ship may not therefore load beyond the draught indicated by the horizontal line of the Tonnage Mark. The tonnage is exclusive of the greater part of the upper 'tween-decks space and the draught is less than the maximum allowed under the Load Line Convention.

Ore/Oil carriers

Two gross and two net tonnages are also recorded, when available, for a ship which is designed to carry either ore or oil cargoes.

HULL

Date of build

For a ship built under the supervision of Lloyd's Register surveyors, the year and month recorded indicate the date of completion of the Special Survey during construction.

When there has been an unduly long interval between the launching and the completion or commissioning of the ship two dates are recorded prefixed by Lch. and Cmpl. or Cmd. The abbreviation Recmd. means recommissioned.

Shipbuilders and Place of build

This records the shipyard where the hull of the ship was built, and not the contractor who accepted the order, nor the yard where the ship was fitted out.

Overall length

The extreme length in feet and inches of the ship as reported by the owners or obtained from other reliable sources. When this measurement is followed by the notation incl. BB in parentheses, this indicates that the ship has a bulbous bow and the overall length recorded includes any protrusion of that bow. If the extreme length is not available the registered length, as given on the ship's Certificate of Registry, is recorded in italics thus *235·7'*.

Extreme breadth

The extreme breadth is the maximum breadth to the outside of the ship's structure and in paddle ships includes the paddle boxes.

Maximum draught

In most cases this is the maximum summer draught amidships, but in some ships of special construction the maximum draught is at the after end, and this figure is recorded. For ships employed on the Great Lakes and rivers, whose freeboards are assigned by Lloyd's Register, the summer draught in fresh water is inserted followed by the letters FW.

For OSD/CSD ships, the summer draught in the open condition is recorded, followed by the draught in the closed condition.

For ships to which tonnage marks have been assigned, as indicated in column 3, the draughts recorded are those at the tonnage mark and the summer (maximum) load line respectively.

Length B.P. (between perpendiculars)

The distance in feet and inches on the summer load waterline from the fore side of the stem to the after side of the rudder post, or to the centre of the rudder stock if there is no rudder post.

Total Horsepower

For engines classed under Lloyd's Register or British Corporation rules, the horsepower recorded is the total maximum designed horsepower approved. In ships not classed with the Society the horsepower recorded is the total maximum service horsepower as reported by the owners or obtained from other reliable sources.

In diesel-electric or turbo-electric machinery, the total horsepower of the oil engines or turbines is recorded, together with the shaft horsepower of each electric motor.

bhp	Brake horsepower (oil engines)
ihp	Indicated horsepower (steam reciprocating engines)
shp	Shaft horsepower (turbines and electric motors)

Type

The type name of an engine is recorded when it has been built under licence.

Fuel Bunkers

The capacity of the bunkers is recorded in tons, followed by an indication of the fuel for which the machinery is fitted, as stated by the owners.

(c)	Burning coal
(d.o)	Burning diesel oil
(hvf)	Fitted for burning high viscosity fuel
(o.f)	Oil fuel

The coal capacity is the estimated capacity of all permanent bunkers. The oil fuel capacity is the estimated capacity of all spaces, including double bottom spaces, which are permanently fitted for the carriage of oil fuel and which have permanent provision for its use on board. The capacity of settling tanks is included. For tankers the tonnage of fuel used in one day is recorded thus: 4½pd (per day). This figure is as stated by the owners.

Auxiliary electrical generating plant

The number of generators is given, followed by the kilowattage and voltage of each generator, the number of cycles (if an a.c. installation) and the type of current (a.c. or d.c.).

Emergency generators and sets used solely for harbour purposes are not recorded.

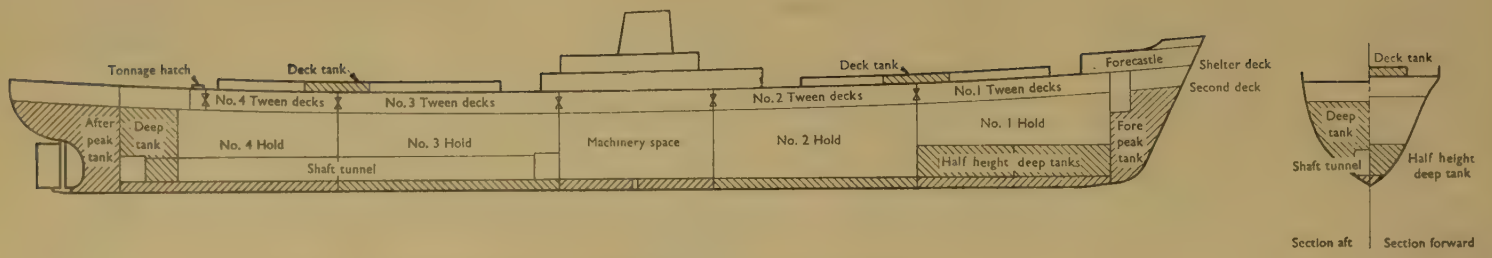
Special propellers

Only special type propellers are recorded, that is: directional, controllable pitch and thwartship thrust propellers. The fitting of propellers both forward and aft is also indicated.

Speed in knots

The speed recorded is that which the ship is stated to be capable of maintaining at sea in normal weather and at normal service draught.

Boilers



Information about boilers is recorded only for ships classed with Lloyd's Register or the British Corporation. When details of boilers are recorded in parentheses thus: (AuxB 100lb) this indicates that the boiler is temporarily out of use.

a	Aft
AuxB	Boiler(s) supplying steam to auxiliary services essential to the operation of the ship at sea; but not supplying steam to the main propelling machinery
c	Centre
cf	Corrugated furnaces
Comp	Composite
db	Domestic boiler(s) supplying steam for purposes not connected in any way with the operation of the ship at sea. Only recorded when working pressure and heating surface exceed 50lb/sq. inch and 50 square feet respectively.
DB	Double-ended boiler(s)
(el)	Electrically heated
e(ex.g)	Exhaust gas economiser
(ex.g)	Exhaust gas (boilers)
f	Forward
hs	Heating surface. The figure recorded is the total evaporation surface of boilers in square feet plus the total surface of superheaters plus half the surface of economisers and is used for calculating the fees for periodical surveys of water tube boilers. Where the figures are recorded in parentheses they may represent only the heating surface of the boilers
htr	Heater
HWB	Hot water boiler(s)
–kg/cm²	Working pressure of boilers
–lb	Working pressure of boilers
lwr	Lower
